

# Armis Developer Portal

A centralized hub designed to help organizations leverage Armis's industry-leading asset intelligence via robust APIs.

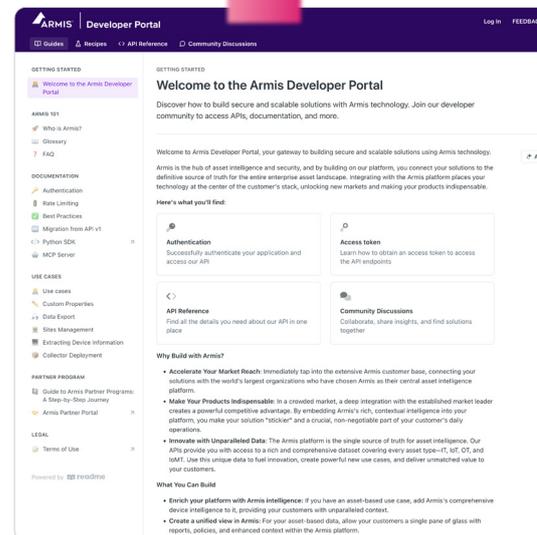

## Executive Overview

The Armis Developer Portal serves as the gateway for developers, partners, and customers to integrate Armis's comprehensive asset intelligence into their own ecosystems. By providing programmatic access to the Armis Centrix™ platform, the portal enables organizations to transform raw asset data into actionable intelligence, automate security workflows, and create a "single source of truth" across IT, IoT, OT, and IoMT environments.

## Versatile Custom Connectivity for the Modern Enterprise

Today's development teams are no longer just connecting standard SaaS apps; they are often bridging the gap between disparate legacy systems and cutting-edge industrial hardware. Developers build high-performance custom connectors that unify an entire ecosystem, from the front office to the factory floor.

The Armis Developer Portal provides a structured, high-performance environment for building secure and scalable integrations. It allows users to harness the Armis Asset Intelligence Engine, which tracks billions of devices, to enrich third-party platforms with unparalleled context. By removing connectivity barriers, developers can focus on building innovative logic rather than troubleshooting handshake protocols between systems.

## Key Capabilities

**Comprehensive Data Export:** Programmatically extract granular device information, including hardware details, software versions, vulnerabilities, and real-time activity.

**Unified Asset Intelligence:** Access data across all asset classes (IT, OT, IoT, Medical) through a single, standardized API framework.

**Python SDK:** Accelerated development through official SDKs.

**Custom Property Management:** Extend the Armis data model by pushing custom business logic or proprietary tags into the Armis platform via API.

**Lifecycle & Site Management:** Automate the deployment of Armis collectors and manage site-specific configurations at scale.

## Strategic Benefits

### Accelerate Time-to-Market

Partners can rapidly integrate their solutions with Armis to reach the world's largest organizations. The portal provides "Recipes" (pre-built code patterns) and clear authentication guides to reduce the development lifecycle from months to weeks.

### Drive Operational Automation

By building on Armis APIs, security teams can automate incident response. For example, programmatically pull normalized data on Applications, Risk Factors, and Vulnerabilities for ingestion into your SIEM or BI platform for further analysis.

### Build "Sticky" Integrations

For technology partners, embedding Armis intelligence makes products indispensable. Providing customers with a "single pane of glass" that combines Armis's rich context with specialized toolsets creates a high-value, integrated user experience.

## Portal Resources

To support the developer journey, the portal offers a comprehensive suite of tools:

- **Interactive API Reference:**  
Test endpoints in real-time within the browser.
- **Developer Recipes:**  
Step-by-step guides for common use cases like data synchronization and vulnerability reporting.
- **Community Discussions:**  
A collaborative space that enables troubleshooting and sharing best practices among Armis engineers and developers.
- **Migration Guides:**  
Clear paths for transitioning from legacy API versions to the latest high-concurrency endpoints.

## Start Building Today

The Armis Developer Portal is more than a documentation site; it is a launchpad for innovation.

By exposing the world's most robust asset intelligence via API, Armis enables organizations to move beyond simple monitoring toward a fully automated, intelligent security posture.

**Start building the next generation of integrated solutions on the industry's leading asset intelligence platform:**

**Armis, the cyber exposure management & security company, protects the entire attack surface and manages an organization's cyber risk exposure in real time.**

In a rapidly evolving, perimeter-less world, Armis ensures that organizations continuously see, protect and manage all critical assets - from the ground to the cloud. Armis secures Fortune 100, 200 and 500 companies as well as national governments, state and local entities to help keep critical infrastructure, economies and society stay safe and secure 24/7.

Armis is a privately held company headquartered in California.
