

Armis Vulnerability Intelligence Database

Intelligence That Moves Faster Than the Threat

Armis Vulnerability Intelligence Database is a revolutionary, AI-powered vulnerability intelligence resource that goes well beyond traditional static databases. While many teams rely on the CISA Known Exploited Vulnerabilities (KEV) catalog to track risk, Armis Vulnerability Intelligence Database is built to extend that value by offering offering detailed remediation Information, industry exposure overview and extended coverage in time compared to other public databases.

Backed by the Armis Asset Intelligence Engine, which observes and analyzes over six billion connected assets globally, and Armis Labs, the Armis Vulnerability Intelligence Database offers the cybersecurity community an opportunity to shift left and move from reactive response to proactive risk reduction.

Armis Vulnerability and Intelligence Database lets you answer the following questions:

- **Is the information about the vulnerability up to date?**
- **Are we more exposed than others?**
- **How exactly do we remediate it?**

[Armis Vulnerability Intelligence Database](#)

Available as a freely accessible cyber exposure intelligence database, or via commercial API access through the AWS Marketplace:

Free of Charge Web Interface

A modern, searchable [microsite](#) designed to bring transparency, speed, and collaboration to the forefront of vulnerability management, including:

- **Detailed Remediation Information**
- **Industry Exposure Overview**
- **Extended Coverage**

Commercial API Access

This direct [access](#) transforms the database from a powerful research tool into a dynamic, integrated component of your proactive security posture.

- **Seamless Integration:** Directly feed Armis's rich, contextual data into your existing stack.
- **Automated Workflows:** Automate vulnerability lookups in real-time, enabling your team to scale its response efforts.
- **Custom Solutions:** Leverage the raw data to build custom dashboards, tailored reports, and proactive alerting that aligns precisely with your organization's needs.

Armis, the cyber exposure management & security company, protects the entire attack surface and manages an organization's cyber risk exposure in real time.

In a rapidly evolving, perimeter-less world, Armis ensures that organizations continuously see, protect and manage all critical assets - from the ground to the cloud. Armis secures Fortune 100, 200 and 500 companies as well as national governments, state and local entities to help keep critical infrastructure, economies and society stay safe and secure 24/7.

Armis is a privately held company headquartered in California.
