

Armis Overview

There is scarcely a week that goes past where there is not a security breach that results in stolen data, financial losses and shaken customer confidence. In the case of organizations involved in critical infrastructure operations, any security incident can put lives directly at risk. Without a paradigm shift to the way we secure our environments, this trend is likely to continue unabated, until now.

Armis – THE Cyber Exposure Management & Security Company

Armis recognized that most attacks are successful, because organizations invariably have security blind spots. Simply put, the organization did not know and thus, the threat became a reality.

In 2015, armed with this knowledge, Armis' mission to enable enterprises to adopt new connected devices without fear of compromise by cyber attack became clear.

Armis, the cyber exposure management & security company, protects the entire attack surface and manages an organization's cyber risk exposure in real time. In a rapidly evolving, perimeter-less world, Armis ensures that organizations continuously see, protect and manage all critical assets - from the ground to the cloud. Armis secures Fortune 100, 200 and 500 companies as well as national governments, state and local entities to help keep critical infrastructure, economies and society stay safe and secure 24/7.

The Armis Centrix™ Platform

Armis Centrix™ is a seamless, frictionless, cloud-based platform that proactively identifies and mitigates all cyber asset risks, remediates security findings and vulnerabilities, and protects your entire attack surface. Armis Centrix™ works in conjunction with your existing security ecosystem and gives organizations peace of mind in knowing that all critical assets are protected 24/7.

Armis Centrix™ Suites empower organization with a robust features and capabilities and scalability to comprehensively address the entire attack surface.

Asset Management & Security

Armris Centrix™ for Asset Management and Security offers a comprehensive solution for organizations seeking to streamline their asset management processes while fortifying their security posture.

With intuitive interface and advanced analytics, Armris Centrix™ empowers organizations to efficiently gain deep situational awareness, track and manage their assets across diverse environments, ensuring optimal utilization and cost-effectiveness. Moreover, its robust security features provide real-time threat detection and response, safeguarding assets from potential cyber risks and vulnerabilities. Armris Centrix™ is the ultimate solution for driving operational efficiency and resilience for modern enterprises.

OT/IoT Security

Armris Centrix™ for OT/IoT Security is a cutting-edge solution tailored to protect operational technology (OT) and Internet of Things (IoT) devices in industrial, critical infrastructure and enterprise environments.

It enables organizations to see, secure and manage their OT/IoT ecosystems with precision and efficiency. With its sophisticated policy, anomaly and behavior analysis capabilities, Armris Centrix™ ensures early threat detection and proactive mitigation, minimizing the risk of cyber attacks and operational disruptions. Elevate your security posture and safeguard critical infrastructure with Armris Centrix™ for OT/IoT Security.

Medical Device Security

Armish Centrix™ for Medical Device Security is a specialized solution engineered to protect healthcare institutions from the growing threat landscape targeting medical devices.

Offering comprehensive visibility, security and control, it enables healthcare providers to monitor, manage, and secure their diverse fleet of medical devices with precision and ease. Leveraging advanced policy, anomaly detection and threat intelligence, Armish Centrix™ empowers healthcare organizations to proactively identify and neutralize potential threats, ensuring patient safety and regulatory compliance. Safeguard your medical infrastructure and maintain operational continuity with Armish Centrix™ for Medical Device Security.

Vulnerability Prioritization and Remediation

Armish Centrix™ VIPR introduces unparalleled advancements by going beyond vulnerability management to find and consolidate security findings across all sources to holistically understand risk and automate prioritization.

Armish Centrix™ for VIPR -prioritization and remediation streamlines the entire remediation lifecycle, from identifying owners to operationalizing fixes, providing a unified platform for prioritization and efficient risk resolution management. Armish Centrix™ for VIPR - prioritization and remediation revolutionizes how organizations mitigate high-risk findings, empowering them to stay ahead of evolving threats and safeguard their organization with confidence.

Early Warning

Armis Centrix™ for Early Warning is the proactive cybersecurity solution designed to empower organizations with early warning intelligence to anticipate and mitigate cyber threats effectively.

By leveraging AI-driven actionable threat intelligence, Armis Centrix™ provides insights into potential threats, allowing organizations to understand their impact and take preemptive action. With deep monitoring of the dark web, coupled with smart honeypots and human intelligence, Armis Centrix™ ensures unparalleled coverage and accuracy, enabling organizations to stay ahead of evolving cyber threats and protect their critical assets with confidence.

Armis Labs

Leading research and reality for next gen asset security.

Armis Labs, a division of Armis, is a team of seasoned security professionals dedicated to staying ahead of the ever-evolving cybersecurity landscape. With a deep understanding of emerging threats and cutting-edge methodologies, Armis Labs empowers organizations with unparalleled visibility and expertise to protect against the threats that matter most, right now.

Armis Labs is more than just a cybersecurity division; it's a thought leader in the field, constantly pushing the boundaries of knowledge and innovation. Through active participation in industry conferences, publication of research papers, and contribution to industry wide projects, Armis Labs shapes the discourse around emerging cyber threats and mitigation strategies.
