# Industry Benchmarks **Use Cases:**

Industry Benchmarks delivers quantifiable metrics to track changes and improvements over time, and measure performance within your industry.
The benchmarking feature enables you to see how your assets compare against a vast collection of assets from the Armis Intelligence Center:
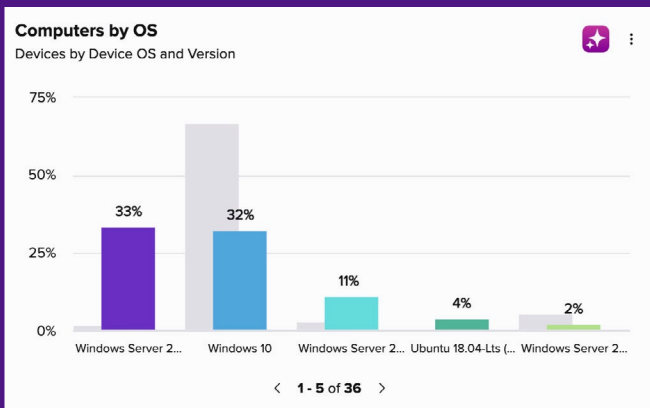

### Aggregated risks
Using pivot tables and applying a calculation for average risks.

### End-of-life operating systems
Using bar charts based on device-OS versions.

### Reference point for eligible dashlets
Compare your data to an industry baseline.

**Computers by OS**
Devices by Device OS and Version

| Windows Server 2... | Windows 10 | Windows Server 2... | Ubuntu 18.04-Lts (... | Windows Server 2... |
|---|---|---|---|---|
| 33% | 32% | 11% | 4% | 2% |

‹ **1 - 5 of 36** ›

## Other Key features that make Armis the go to platform to understand how teams and tools are performing:

### Dashboards

Armis users benefit from powerful visualization capabilities for reporting and dashboarding. The brains behind these representations is the Armis Standard Query (ASQ), supporting natural language input and thus can be purpose-built to meet the precise need. Pivot tables are supported as well, eliminating the need to export the data to another tool for analysis.
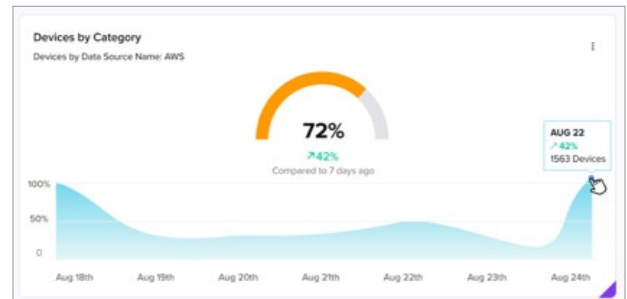

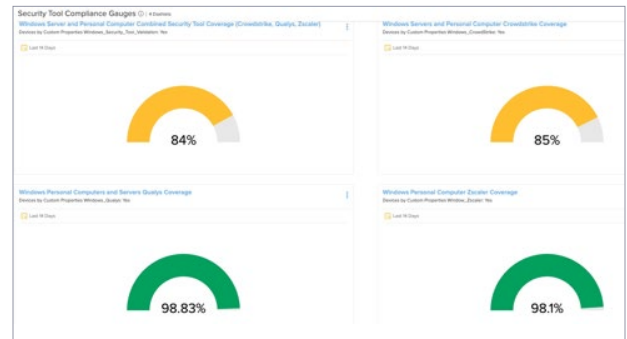

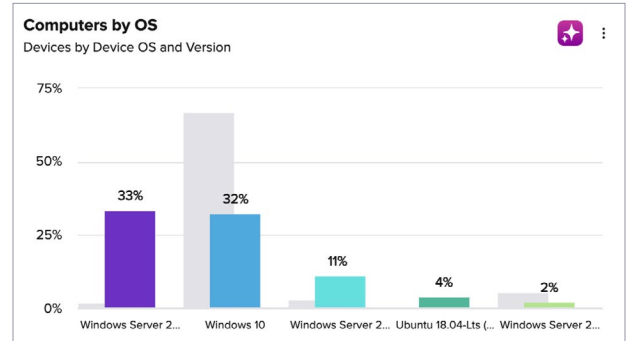

### Gauge Dashlets

The gauge visualization emphasizes the gap and helps you to focus on what matters first. Users can quickly customize any goal or KPI, and grasp progress in the blink of an eye to facilitate informed decision making.

### Trend Over Time

Executive reports are all about data visualization: It helps to communicate a clear message about the progress of a value over time. For example: CISOs may want to know if they have more devices with active endpoint agents compared to last month, so they can share progress with the CIO. "Trend Over Time" is available for gauge and count dashlets in Armis Centrix™.

**Armis empowers you to make informed decisions that lead to sustainable growth, by providing your with concrete data and actionable insights about your organization and how it stacks in relation to others in your industry.**

**You don't have to reinvent the wheel— learn from the best and propel your business to new levels of efficiency and success.**

## Armis Intelligence Center

At the heart of these Industry Insights is our Armis Intelligence Center. It Includes over 4,5 billion devices, roughly 20% of the devices connected to global networks. It delivers significant insights covering 25,000 locations, 165 countries, and 17 industries. It allows for reports over various periods of time to support everything from business intelligence and investment strategies to cyber intelligence and threat hunting.
