

Armis Centrix™ for Application Security

Eliminate AppSec Fragmentation and Secure Your Entire Software Supply Chain

The New Realities of Application Security

Modern application security is burdened by tool sprawl, AI-generated vulnerabilities, and a lack of context that prevents comprehensive Cyber Exposure Management (CEM). Traditional AppSec approaches can no longer keep up.

Focus on the Risks That Matter, Automate the Rest

Armis Centrix™ for Application Security is a unified, AI-powered solution built to transform application security from fragmented scanners into a cohesive, risk-aware posture management system. Seamlessly integrating into IDE, GIT, CI/CD pipelines and containers, Armis Centrix™ for Application Security helps security and development teams:

Discover and Detect

- AI-powered scanning across 130+ languages, configs, IaC and SBOMs.
- Uncovers secrets, vulnerabilities, licenses and more all in one pass.

Prioritize with Context

- Noise-free insights enriched with exploitability, reachability and execution logic.
- Helps teams focus only on the risks that truly matter.

Automate and Fix

- Findings auto-routed to the right owner with AI-generated fixes.
- Seamlessly integrated into Git, CI/CD and ticketing for rapid, scalable remediation.

AppSec That Delivers

AI Code Security Analysis

Business Outcome: Detects vulnerabilities in AI-generated code before production, preventing scalable risk exposure.

CI/CD Pipeline Security Integration

Business Outcome: Real-time scanning and remediation workflows within developer tools accelerate secure releases.

Supply Chain Risk Management

Business Outcome: Visibility into SBOM, open source, and container risks reduces supply chain breach likelihood.

False Positive Reduction

Business Outcome: Cuts alert noise by up to 70%, boosting developer productivity and focus.

Ownership Assignment and MTTR Reduction

Business Outcome: Aligns security alerts with the right teams, reducing friction and shortening remediation windows.

Runtime-Aware Risk Justification

Business Outcome: Uses runtime context to avoid unnecessary remediations, saving time and cost.

Precision at Scale: Secure Your Entire Supply Chain with AI-Driven Clarity

Achieves high accuracy and supports an unlimited number of languages

Gain full software supply chain visibility (SAST, SCA, IaC, Secrets, Open Source Licenses)

Focus only on what matters, what's reachable, exploitable, and in production

AI models that detect variants and generate recommendations to remediate issues quickly

Easy enterprise-wide onboarding with Armis Centrix™

How It Works

Discovery and Detection Engines

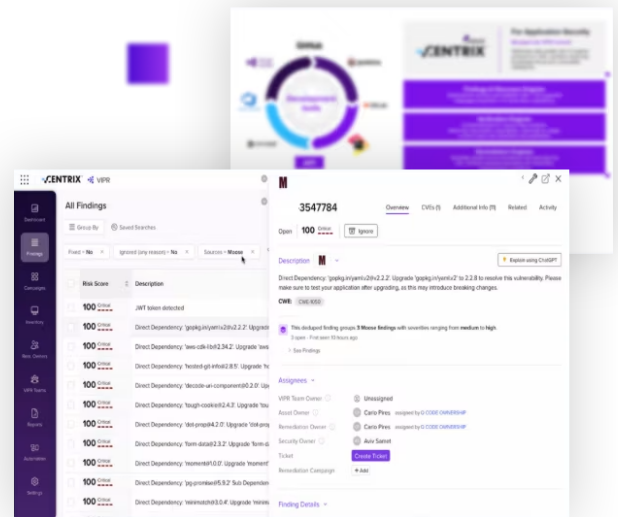

Leveraging custom LLM and symbolic reasoning, Armis Centrix™ dynamically scans an unlimited number of languages, without using noisy templates, across SAST, SCA, IaC, Secrets, Open Source Licenses and SBOMS. Built from the ground up using custom AI models, this layer provides top AppSec coverage and results that outperform today's industry benchmarks.

Contextual Intelligence Engines

Armis AI enriches every finding with validation, exploitability, reachability, and execution context. This drastically reduces false positives thus helping security teams and developers focus only on what introduces real risk.

Remediation and Routing Engines

Integrated into GIT, CI/CD, and ticketing systems, Armis Centrix™ for Application Security automates ownership routing, provides AI-generated fix recommendations curated to each line of code, seamlessly integrates into engineering workflows and empowers developers to resolve issues without friction. Combined with Armis Centrix™ for VIPR Pro - Vulnerability Prioritization and Remediation, alerts are enriched with business context and remediated faster.

Get the big picture on today's security challenges—and how Armis helps solve them.

Explore Armis Centrix™ Today

Armis, the cyber exposure management & security company, protects the entire attack surface and manages an organization's cyber risk exposure in real time.

In a rapidly evolving, perimeter-less world, Armis ensures that organizations continuously see, protect and manage all critical assets - from the ground to the cloud. Armis secures Fortune 100, 200 and 500 companies as well as national governments, state and local entities to help keep critical infrastructure, economies and society stay safe and secure 24/7.

Armis is a privately held company headquartered in California.
