

Securing Healthcare with Armis Centrix™

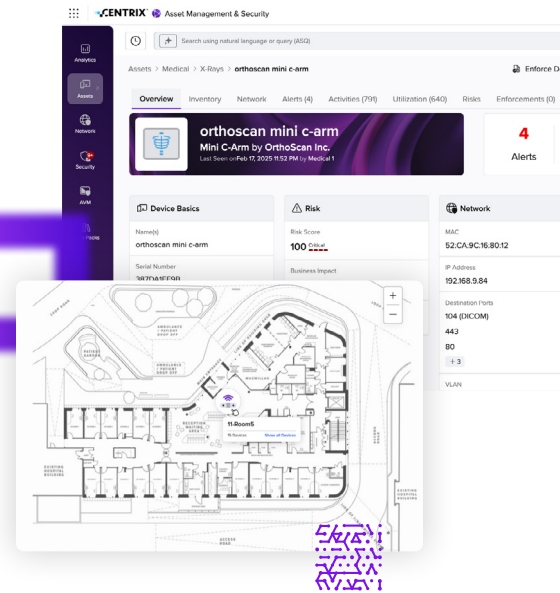

Proactive Cybersecurity for Every Touchpoint of the Patient Journey

Patient-Centric Cybersecurity, Risk Reduction, and Future-Proofed Protection

As healthcare delivery organizations continue to adopt innovative technology, the cyber attack surface is constantly expanding. The average hospital uses thousands of network-connected assets, with dozens directly at the bedside. Armis Centrix™ identifies and mitigates all cyber exposure risks, remediates security findings and vulnerabilities, and protects your entire attack surface, powering secure technology and continuous patient care.

Effective Cyber Risk Management for Secure Patient Care

Armis revolutionizes healthcare cybersecurity by addressing the unique challenges of protecting complex, sensitive medical devices and the broader healthcare technology environment. Designed for leading hospitals, clinics, and healthcare systems, Armis Centrix™ seamlessly integrates with your existing systems for comprehensive coverage, total protection of every asset, and real risk reduction that keeps your patients and equipment safe.

Armis Centrix™ for Healthcare: Unified Cyber Exposure Management

Proactive Threat Intelligence and Alerts

Protect your healthcare organization from emerging attack methods to prevent downtime or disruptions.

Armis Centrix™ for Early Warning delivers real-time threat intelligence about tactics, techniques, and procedures (TTPs) attackers use and their potential impact to protect against zero-day vulnerabilities and threats, including ransomware. Prioritize mitigation efforts based on the current threat landscape and asset criticality to the business and establish a proactive security posture.

Medical Device Behavioral Insights

Armis Centrix™ for Medical Device Security provides cyber exposure management tailored for healthcare, for better resource allocation, asset lifecycle management, and optimized patient flow. View behavioral insights and get alerted for any anomalous or potentially risky behavior. Manage asset risks while gaining unique healthcare insights, including FDA recalls, device utilization, MDS2 information, and the physical location of every asset, improving collaboration between clinical engineers and IT security.

Actionable Risk Remediation

Armis Centrix™ for VIPR – Prioritization and Remediation drastically reduces the effort involved in vulnerability management, allowing you to target mitigation and remediation efforts based on the biggest risks to patient safety and operational continuity. Deduplicate, contextualize, and prioritize findings into actionable fixes, make the best use of your resources, and address risks in real-time.

Key Features That Make Armis Centrix™ the Go-To Platform for Cyber Exposure Management

- Complete medical device visibility**, from regional scope to seeing every device in the patient room or on a cart.
- Usage analytics** improve patient care, device utilization hours, and enable better maintenance scheduling.
- Automated and detailed inventory** of every connected asset in your environment, even across dispersed locations.
- Integration with diverse tech stacks** maximizes your existing investments, enabling a quicker time to value and visibility.
- CMMS workflow integration** communicates the most up-to-date information about every medical and technology asset. Automatically create work orders and initiate remediations for efficiency and faster resolution time.
- FDA recall, advisory tracking, and remediation** automatically alerts you to affected devices and indicates their location.
- Out-of-the-box healthcare dashboards** and customizable views give your clinical engineering, executive, and IT security teams the information most important to their work, reducing overall noise by quickly getting to the data most relevant to the specific role.
- Clinical impact scoring and prioritization** based on attributes including: patient dependence, failure effect, and cost for healthcare-focused prioritization.
- Medical device lifecycle management** allows organizations to assess medical technology security profiles prior to purchase and automate proactive risk reduction throughout the lifecycle of the device.
- Early Warning feed** powered by Armis Centrix™ for Early Warning allows you to leverage our insights derived from Armis Labs in addition to our AI-powered pre-attack threat hunting and deception technology to secure your healthcare organization against attacks that are or are about to be weaponized.
- Vulnerability and risk assessment** reduces MTTR with AI-based detection, deduplication, contextualization and prioritization, and remediation process that considers business impact, patient risk, and criticality.
- Remediation campaigns and predictive ownership** powered by Armis Centrix™ for VIPR Pro - Prioritization and Remediation, connect security findings to the fix, speeding up time to remediation and eliminating manual effort and guesswork.

Key Benefits

- Reduce outages and business impact** with full-scope visibility and protection of every asset, keeping your organization and patients safe.
- Streamlined clinical engineering workflows for managing recalls**, vulnerabilities and other security findings.
- Enhanced patient safety** with greater device security and data protection.
- Identify cyber risk patterns** with clinical asset context, powered by the Armis Asset Intelligence Engine.
- Proactive protection** with real-time intelligence and early warning alerts.

Leader in Cybersecurity. Protecting the Entire Healthcare Ecosystem

The modern healthcare attack surface extends far beyond just medical devices. Armis Centrix™ provides the only platform that allows you to see, protect, and manage the risk of every device in one place, from IoMT to IT, OT, and IoT assets. Our platform is consistently recognized as a leader by top industry analysts, ensuring you get the best protection for your healthcare organization.

Get the big picture on today's security challenges—and how Armis helps solve them.

[Explore Armis Centrix™ Today](#)

Armis, the cyber exposure management & security company, protects the entire attack surface and manages an organization's cyber risk exposure in real time.

In a rapidly evolving, perimeter-less world, Armis ensures that organizations continuously see, protect and manage all critical assets - from the ground to the cloud. Armis secures Fortune 100, 200 and 500 companies as well as national governments, state and local entities to help keep critical infrastructure, economies and society stay safe and secure 24/7.

Armis is a privately held company headquartered in California.
